

DIMENSIONS

K9 Spa Tub Measurements:
 Measurements in inches and taken from top and/or inside of tub, unless otherwise specified.
 Measurements can vary +/- 1/4"
 Fiberglass Thickness: ~ 3/16"

PLUMBING

We suggest plumbing the K9Spa like a raised utility sink or shower. Drawing is a suggestion of this plumbing where water entry is mounted 6-8" or more above the K9Spa and water exit is similar to a utility sink with a 2" PVC or ABS drain installed. **NOTE** this is one option/configuration please consult your plumber to make sure all city requirements are met.

BASE STRUCTURE PER ADA:

Base height 30-34" per ADA
 Please increase height of legs to 38" - 45" for standing comfort for non ADA Wheeled customers. Tubs should be **FULLY SUPPORTED UNDERNEITH** the K9Spa not by the sides! The K9 Spa tub weighs 65 lbs.
