

Simply the best dog wash tubs!

### **Care & Cleaning**

K9Spa's are very elegant looking and to keep them clean and looking there best, please use the following guidelines. Not following these guidelines could void your warranty.

Cleaning – use only non-abrasive, mild cleaners with a soft towel to wipe down the tub. Follow every cleaning with a through rinsing to make sure no chemicals stay on the tub. We recommend using diluted mild household cleaners like Simple Green or Mrs. Meyers Clean Day.

If there is a need for a chemical cleaning due to fleas or an illness, we use 256 products diluted to the correct amount. Again never leave a chemical on the K9Spa – always rinse immediately after use.

The bottom of the tub has a texture and can be washed with a non-abrasive cleaner and a soft brush.

Once a year or as needed you can polish/buff your K9Spa to the shiny new finish it arrived as. This is a great way to reduce the appearance of scratches and wear and tear. Use any car or boat products that are safe for fiberglass. In an hour or two your K9Spa will look and feel new again, year after year!

Never use harsh chemicals or scratchy scrubbers like bleach and scouring pads. These items will scratch and damage your K9Spa over time.
